Significant Data Identification Worksheet

Instructions

In collaboration with your partner on the Leadership Team, look at each assessment in turn and pick out one to four data points per assessment that you feel are significant. Record them on the opposite side of this sheet. Please submit these data points to Erin Read (215-5549, erin.read@knoxcounty.org) by February 24, 2011.

Timeline and Process

T!HK Activity	January	February	March	April	May
Present results from LPHSA and FOCA					
Present results from CTSA and CHSA					
Leadership Team members fill out Significant Data Worksheets					
Leadership Team members send Significant Data Worksheet information to Erin Read by Feb. 24					
Leadership Team works together to categorize significant data into groupings					
Executive Team uses significant data groupings to define strategic issues & plans community meeting					
Leadership Team revises list of strategic issues					
Leadership Team members help recruit partners for action teams					
Community meeting to announce strategic issues and recruit for action teams					

Definitions

A **strategic issue** is a fundamental policy choice or critical challenge that must be addressed for our community to achieve the vision "Building a diverse, vibrant community that nurtures good health and quality of life." Our strategic issues should represent the most compelling findings that emerge from the four T!HK assessments.

The Knox County **local public health system** includes all of the agencies, organizations, individuals and businesses that must work together to create conditions for a healthy community. Individuals and organizations from outside the T!HK Leadership Team may be recruited to develop and implement the action plan that results from strategic issues.

- 1. Looking at any one of the four assessments, what data points were surprising?
- 2. What data points illustrate a greater problem or deficiency in Knox County, in your opinion?
- 3. What data points seem to invite a closer look or seem to need more context?
- 4. What data points seem to be strongly connected with one another, or to contradict one another? Please submit these data points to Erin Read (215-5549, erin.read@knoxcounty.org) by **February 24, 2011**.
