NACCHO Performance Improvement Technical Assistance Webinar Series

The webinar will begin at 2:00 pm ET.

January 2012
Moderated by: Miriam Sznycer-Taub
To ask a question, unmute your phone…

The phone lines have been muted.

• If you have a question and would like to unmute your phone, please press STAR (*) 7.

• After asking your question, press STAR (*) 6 to mute through the ReadyTalk system.
Open Q & A

You may pose a question by asking it during the Q & A portion of the webinar today or by using the chat function in ReadyTalk, located in the lower left-hand corner of your screen.
Today’s Topic: Strategies for LHD & Hospital Collaboration

Presenters

Julia Joh Elligers
Director of Assessment, Planning, & Workforce
NACCHO
jjoh@naccho.org
(202) 507-4234

Julie Trocchio
Sr. Director, Community Benefit & Continuing Care
The Catholic Health Association of the United States
Jtrocchio@chausa.org
(202) 721-6320
Questions

• Our health department does not have a close relationship with our hospital. Who at the hospital should I talk to about working together on a community health assessment?
Questions

• How can we engage hospitals that are not interested in completing a comprehensive community health assessment?
Questions

• Any advice on how an LHD and hospital can co-lead an assessment process? How can we ensure that one entity is not disproportionately burdened with all the work?
Questions

• How can we engage competing non-profit hospitals in our assessment process?
Questions

• Given that non-profit hospitals will have to complete an assessment every 3 years per ACA and health departments will have to complete an assessment every 5 years per PHAB, how can we align efforts so hospitals and LHDs are well-positioned to meet their respective requirements?
Questions

• How can you get hospitals to release de-identified data for a joint data collection process in which public health and the hospitals work together for a joint community health needs assessment? It seems the hospitals are very protective of their data and sharing with other agencies has been an issue.
Questions

• What type of data sets do you use for a joint data collection process? Do you have a template to share?

Common Sources of CHA Data

1) Local, state, national databases
   • County Health Rankings
   • State vital records
   • Census data

2) Previously conducted health assessments or reports
   • United Way CHA
   • Hospital CHNA
   • Community Health Centers

3) Partners who have access to data through their organizations
   • County government agencies such as courts, police, schools, libraries, parks, city planners
   • Non-profit organizations
   • Managed care organizations
   • Universities and colleges
   • Chamber of Commerce
Questions

• Do you have any best practices for data sharing?
